

**A.R.C.**  
ACID REPLACEMENT CLEANER

**DESCRIPTION**

**A.R.C. Acid Replacement Cleaner** is a groundbreaking concentrated cleaner designed to revolutionize the cleaning industry. With a remarkably low pH level of less than 1, it delivers the potent cleaning power typically associated with acids while maintaining a gentle touch on the skin similar to liquid dish soap. This unique formulation makes it an exceptionally safe and effective cleaner suitable for a wide range of surfaces.

**FEATURES & BENEFITS**

- pH level of less than 1 yet, gentle on the skin like liquid dish soap.
- Multipurpose cleaner suitable for various surfaces.
- Ideal for removing stains and rust from concrete buildings and walks.
- Effectively removes cement from construction equipment, trucks, pouring forms, structural steel, and tools.
- Dissolves hard water build-up, lime, scale, and corrosion in boilers, air conditioners, refrigeration units, condensers, and circulating systems.
- Utilizes a proprietary inhibitor package to prevent damage to metals.
- Enhanced cleaning actions facilitated by detergents and wetting agents.
- Nonflammable and biodegradable, offering an eco-friendly cleaning solution.

**RECOMMENDED USES**

- Concrete buildings and walks
- Construction equipment
- Trucks
- Pouring forms
- Structural steel
- Tools
- Boilers
- Air conditioners
- Refrigeration units
- Condensers

<b>PROPERTIES</b>	
Color	Dark Red, or Clear
Fragrance	Sweet, Acidic
Concentrate	Yes
pH	<2
Density	10.40
VOC Content	<5%
<b>PACKAGING</b>	
12 x 1 qt	1132-12
4 x 1 gal	1132-4
1 x 5 gal	1132-5
1 x 30 gal	1132-30
1 x 55 gal	1132-55
<b>DOT</b>	
Proper Shipping Name	Corrosive Liquid, acidic, organic, n.o.s., (Urea Hydrochloride),
Class	8
UN/NA Number	UN 3265
Packing Group	III

*For industrial use only. Refer to the product's Safety Data Sheet (SDS) for complete safety, handling, and first aid information.*

**A.R.C.**  
**ACID REPLACEMENT CLEANER**

**DIRECTIONS**

1. Dilute **A.R.C. Acid Replacement Cleaner** as per recommended ratios for specific cleaning tasks.
2. Apply the solution to the surface to be cleaned using a brush, mop, sprayer, or other suitable applicator.
3. Allow the cleaner to penetrate and act on the surface for a few minutes.
4. Agitate the surface with a brush or sponge to enhance cleaning effectiveness if necessary.
5. Rinse the cleaned surface thoroughly with water.
6. Repeat the process if required for stubborn stains or heavy build-up.

*For industrial use only. Refer to the product's Safety Data Sheet (SDS) for complete safety, handling, and first aid information.*
