

Vita-Bac Ultra

Industrial Drain Maintainer

Technical Data Sheet (TDS)

DESCRIPTION

Vita-Bac Ultra is an ultra-concentrated biological drain treatment containing trillions of naturally occurring bacteria designed to digest fats, oils, and grease (FOG). Delivered through an automatic dispensing system, Vita-Bac Ultra provides continuous treatment to help maintain free-flowing drains, reduce grease buildup, and control odors at the source.

FEATURES & BENEFITS

- **Continuous Biological Treatment** – Provides ongoing inoculation of beneficial bacteria.
- **Targets Fats, Oils & Grease** – Helps digest FOG before it accumulates.
- **Ultra-Concentrated** – Billions of bacterial digesters per dose.
- **Surfactant Free** – Will not emulsify FOG.
- **Non-Toxic & Biodegradable** – Ideal for routine drain maintenance.

AUTOMATIC DISPENSING SYSTEM

Install Vita-Bac Ultra refill cartridge into the designated automatic dispensing unit according to dispenser instructions.

Connect the clear delivery tube to the dispensing unit and position the discharge end directly over the designated floor drain, drain line, grease trap, interceptor, or other treatment point.

Program the dispenser according to the treatment requirements of the facility and system being treated.

The dispenser will automatically deliver measured quantities of Vita-Bac Ultra at scheduled intervals, providing continuous biological treatment.

NOTE: For best results, use Vita-Bac Ultra as part of a regular preventive maintenance program. Product performance may vary depending upon drain configuration, wastewater characteristics, FOG loading, temperature, flow, and other site-specific conditions.

Do not mix with disinfectants, sanitizers, strong acids, strong alkalis, or other products that may adversely affect bacterial activity.

Item Number:
1530

AREAS OF USE

Floor Drains
Grease Traps
Grease Interceptors
Sewage Ejectors
FOG-Prone Drainage Systems.

COMMON USERS

Restaurants
Hotels
Casinos
Schools
Government Facilities
Commercial / Institutional Operations

PROPERTIES

Physical State	Liquid
Appearance	Blue Liquid
pH	7.0 - 8.5
RTU	Yes
